Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. This place is called a "battery enclosure", or what is.

Heavy batteries demand a solar battery box with extra strength and durability. In order to protect outdoor batteries from weather and damage, Bison Profab manufactures custom NEMA 3R enclosures. Solar batteries require certain conditions to maintain their productivity and also require air flow.
