

Tuvalu IP54 Outdoor Cabinet

Overview

What is an IP54 enclosure?

IP54 enclosures offer partial dust protection and resistance to water splashes—ideal for light indoor or semi-outdoor use. They're suitable for factories, garages, telecom equipment, smart devices, and public infrastructure. Materials vary from plastic to stainless steel, and can be wall-mounted, floor-standing, or pole-mounted.

Are IP54 enclosures waterproof?

IP54 enclosures can handle water splashes from any direction, like light rain or cleaning spray. Just keep in mind—they are not waterproof, so they shouldn't be used in heavy rain or underwater. They're built to be tough. IP54 enclosures can handle bumps or knocks, which makes them a good choice for factories or busy work areas.

What is the difference between IP54 and IP65 enclosures?

Both IP54 and IP65 enclosures protect against dust and water, but there's a big difference in strength. IP54 gives you limited dust protection and guards against water splashes from any direction. It's great for indoor or light outdoor use where conditions are fairly controlled.

What materials are used for IP54 enclosures?

Materials used for IP54 enclosures include: Plastic (either polycarbonate or ABS): They are resistant to corrosion, save cost, and are naturally lightweight. Stainless Steel: This offers the best durability and provides strong resistance against harsh chemicals. This is why it is suitable for marine applications, medical use, etc.
