

UK Expressway User Outdoor Communication Cabinet Three- Phase

Overview

What is the IP55 specification for outdoor telecoms street enclosures?

We manufacture our outdoor telecoms street enclosures to IP55 specification using galvanised steel. Compliance with IP (Ingress Protection) ratings and NEMA (National Electrical Manufacturers Association) standards certifies their ability to withstand environmental conditions and protect sensitive equipment.

What materials are used in telecommunication enclosures?

A choice of aluminium or steel panels or GRP with ply core. Our enclosures comply with industry standards and regulations, ensuring that telecommunication equipment housed within meets safety and performance requirements. We manufacture our outdoor telecoms street enclosures to IP55 specification using galvanised steel.

Why should you choose eldapoint Telecom enclosures?

Our telecom enclosures are manufactured with the highest quality standards under the ISO 9001:2005 manufacturing and quality management system. We can help with: For the storage and protection of communications equipment and technologies, choose an Eldapoint enclosure.

What is a telecommunications enclosure?

Telecoms enclosures are indispensable for housing and safeguarding critical communication equipment in outdoor environments. These purpose-built cabinets are engineered to protect susceptible telecommunications equipment, such as routers, switches, power supplies, and network components, from environmental elements and potential security threats.
