

# Uzbekistan solar telecom integrated cabinet wind and solar hybrid closed

## Overview

---

How is Uzbekistan achieving its solar power target?

Uzbekistan has made a positive effort toward that end, including by setting clear targets and reforming the energy sector and has been progressing toward achieving the solar power capacity target of 4 GW by 2026 and 5 GW by 2030.

What is the Uzbekistan energy project?

7. The Project builds on the World Bank energy program in Uzbekistan by scaling up the private investment and commercial financing, diversification of power mix from domestic resources (solar), clean energy transition and decarbonization.

What is Uzbekistan's solar energy vision?

It outlines the sustainable energy environment solar energy could deliver and offers a timeline up to 2030. In this vision, Uzbekistan succeeds in maximising the benefits of solar energy capacity for both electricity and heat, making solar energy one of the country's major energy sources.

Can variable solar power be used in Uzbekistan?

variable solar electricity benefits from the local flexibility provided by dispatchable, highly flexible hydropower, thus limiting impacts on the power system. There are currently 25 reservoirs in Uzbekistan, with a total water surface of 1 500 km<sup>2</sup>, 4 of which are hydropower reservoirs totalling 890 km<sup>2</sup> (CAWater, 2021).
