Large-scale energy storage systems are the backbone of our evolving power grid – sophisticated technologies that capture excess electricity when it’s abundant and deliver it precisely when needed. Think of them as massive reservoirs for electricity, enabling the reliable integration of renewable.

KCE NY6, a 20MW/45.6MWh BESS project by Key Capture Energy in Buffalo, Upstate New York, was one of a small number of projects successfully brought into commercial operation with Bulk Market Acceleration Bridge Incentive Program from Roadmap 1.0. Image: Key Capture Energy Applications are invited.
