Our 14.4V 6000mAh 21700 battery pack is the perfect high-capacity replacement for standard 4S1P 18650 setups. The original 4S1P 18650 design often falls short in continuous operation—our 4S1P 21700 6000mAh solution delivers extended power. Max. Charge Current Max. Discharge Current 4S1P 14.4V.

The capacities of 21700 batteries on the market generally fall into the following ranges: 4000–5000 mAh: Most standard 21700 batteries, suitable for power tools, e-bikes, and other high-drain devices. 5000–5500 mAh: High-performance cells like LG M50T or Samsung 50E, providing longer runtime for.

The name comes from the size: 21 mm in diameter and 70 mm in length. They're slightly bigger than the classic 18650 cells, but that extra space means a nice jump in capacity and discharge performance. From my own experience, the biggest difference is that devices simply last longer without adding.

The 21700 battery is a cylindrical lithium-ion battery that is rechargeable and has

a diameter of 21 mm and a length of 70 mm. It is becoming more popular due to its increased capacity, which renders it an ideal choice for high-drain devices such as lamps. It operates at a nominal voltage of 3.6V. What is the maximum capacity of a 21700 battery?

The 21700 battery can reach a maximum capacity of 5000mAh, a 42% increase from the 18650. Improved Efficiency: With its higher capacity, fewer cells are needed to achieve the same battery pack size, which reduces complexity.

Is a 21700 Battery Worth It?

Sure, it's pricier than a traditional 18650 setup, but the efficiency gain makes it worth it. Not all 21700 cells are built the same. Some are optimized for high capacity (great for long runtime), while others are tuned for high discharge rates (better for power-hungry tools or drones).

What is a 21700 battery pack?

If you've been around anything that runs on lithium batteries—whether it's drones, e-bikes, power tools, or even flashlights—you've probably noticed the buzz around 21700 battery packs. The name comes from the size: 21 mm in diameter and 70 mm in length.

What is the difference between 26650 and 21700 battery?

- The 26650 battery has a diameter of 26mm and a length of 65mm, and the 21700 battery diameter is 21mm and the length is 70mm. This difference defines their compatibility and uses. Capacity: • The 26650 battery has a high capacity that is from 4000 mAh to 5500 mAh. 21700 battery capacity is 3,000mAh to 5,000mAh.
