

Which is better for a 20MWh outdoor solar cabinet financing options

Overview

In 2025, solar.com Energy Advisors typically recommend using a solar loan to finance a solar system — if the homeowner can efficiently monetize the 30% federal tax credit. If they can't, then a solar lease or PPA is the best option. Want to see your solar savings potential?

In 2025, solar.com Energy Advisors typically recommend using a solar loan to finance a solar system — if the homeowner can efficiently monetize the 30% federal tax credit. If they can't, then a solar lease or PPA is the best option. Want to see your solar savings potential?

Hidden Fees Can Increase Solar Loans by 30%: The Consumer Financial Protection Bureau has identified that some solar lenders include dealer fees and markups that can inflate loan amounts by 10-30% above cash prices, significantly impacting total costs and monthly payments without clear disclosure.

But financing makes solar installation accessible to more homeowners. A study by the National Renewable Energy Laboratory (NREL) titled, ' Low- and Moderate-Income Community Solar Policies' found that financing options have been key to expanding solar adoption, especially among middle-income.

Compare all payment methods: cash purchase, solar loans, leases, PPAs, and PACE financing. Find the best option for your budget and maximize your solar savings. Pay for your solar system upfront and own it immediately. Typically provides the highest long-term savings and fastest payback period.

Solar panels can help reduce electric bills, but a solar energy system requires a large upfront investment. Personal loans and home equity financing are two ways to pay for solar panels. NerdWallet is committed to editorial integrity Many or all of the products on this page are from partners who.

The right financing choice can maximize your solar savings—here's how to pick the best option for your home. Why trust EnergySage?

As subject matter experts, we provide only objective information. We design every article to provide you with deeply-researched, factual, useful information so that you.

Switch to solar with a system built for you. A typical residential solar system costs \$14,210 to \$28,241 before incentives, but going solar doesn't mean you need all that cash upfront. Today's financing options make clean energy accessible to homeowners regardless of budget. You can own your system.
