

Which solar energy storage company is suitable in senegal

Overview

Voltaia SA and Entech SE, both French companies, have been contracted to construct a 60-MW solar park equipped with battery storage for Axian Energy in Senegal. This project is part of Axian Energy's efforts to enhance renewable energy infrastructure in the region.

Voltaia SA and Entech SE, both French companies, have been contracted to construct a 60-MW solar park equipped with battery storage for Axian Energy in Senegal. This project is part of Axian Energy's efforts to enhance renewable energy infrastructure in the region.

Dakar, Senegal, August 7, 2025 – Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in West Africa combined with lithium-ion battery storage, designed for frequency regulation and to meet local energy.

Dakar, Senegal, August 7, 2025 – Just one year after laying the foundation stone, Africa REN announces the commercial commissioning of Walo Storage, the first photovoltaic facility in West Africa combined with lithium-ion battery storage, designed for frequency regulation and to meet local energy.

The project has been touted by the developer as the first solar PV facility in the region to be combined with lithium-ion battery storage. Described as a first for West Africa, a solar PV installation with battery storage project dedicated to frequency regulation has been commissioned in Senegal.

Battery storage is technically and economically more competitive than conventional spinning reserve technologies. Combining photovoltaic solar with a storage system is a unique solution to meet the current and future needs of the grid. In order to complement and intensify our local impact, Walo.

Africa REN, a leading pan-African renewable energy developer, has energized the Walo Storage project in Bokhol, Senegal, a groundbreaking solar-plus-storage facility featuring 16 MW of solar photovoltaic (PV) capacity and a 10 MW/20 MWh lithium-ion battery. This project is West Africa's first.

These mobile systems bridge gaps between solar/wind farms and urban/rural grids

- think of them as "power banks on wheels." "A single 500kWh storage vehicle can power 200 households for 8 hours - that's transformative for off-grid communities." - EK SOLAR Project Manager In 2023, three storage.
