, and Federal and state agencies. We offer lightweight and concrete solutions for your equipment shelter needs. Factory fabricated, Thermo Bond provides both standard and fully-integrated buildings depending on your unique requirements. Our experienced technicians and licensed electricians can.

With over 20 million enclosures deployed and more than 50 years of innovation, Charles is the communications industry's go-to source for enclosed solutions. Combining a consultative approach and engaged support, we guide you through protecting your critical network infrastructure. With integrated.

An outdoor communication cabinet is a specialized enclosure designed to safeguard critical communication equipment in outdoor settings. These cabinets shield sensitive devices like routers and switches from harsh weather, dust, and temperature fluctuations. By providing a controlled environment.

The WOD-62DXC NEMA enclosure (63"H x 32"W x 30"D, 33 RU) is a heavy-duty, all-weather solution designed for telecom and mission critical applications. Built from AlumiFlex®, a lightweight yet durable material, it provides steel-like strength to support the heaviest equipment. Available in NEMA 3R.

Converged technology for a safer, stronger construction industry. Safer job sites, efficient and productive teams, and critical communications for the construction industry combine to build a connected workforce. ERS Wireless protects workers with integrated and reliable technology for construction.

332/334 CCTV Equipment Cabinets are ideal for accommodating all

communications requirements. Patterned after the industry standard 170/2070⁺ style cabinet, the 332/334 CCTV Equipment cabinet's rugged construction make it an excellent choice for dependable, low-maintenance installations. Its rack. What is a traffic control cabinet?

These cabinets combine a compact footprint with added vertical space to house more advanced traffic management equipment, making them ideal for both vehicle and pedestrian signal control in urban and suburban environments.

What is a 336s cabinet?

The 336S cabinet provides the same base dimensions as the standard 336 model but features an extended vertical design. This added height allows for additional internal space, making it easier to accommodate advanced traffic signal equipment, communication modules, and power management systems.

Are Caltrans cabinets compliant?

As traffic management technology evolves, municipalities require cabinets that are both compliant and adaptable. Bison ProFab's 336S Caltrans enclosures meet Caltrans-approved traffic signal pole standards, giving agencies confidence in regulatory compliance.

What is a Caltrans 336 cabinet?

Designed with Caltrans specifications in mind, these enclosures meet strict state standards while delivering exceptional performance, durability, and flexibility. The 336S cabinet provides the same base dimensions as the standard 336 model but features an extended vertical design.
