Can you use an off-grid inverter for a grid tie solar PV system?

You can't use an off-grid inverter for a grid tie solar PV system. It can easily damage the whole system and here is why. Unlike off-grid inverters, grid tie inverters have a special control device to match the inverter cycles with the utility grid cycles. They need to be in phase, otherwise the voltages will cancel each other out.

What is DC-AC converting in a solar grid-tie inverter?

DC-AC converting is not its only function. Solar grid-tie inverter also gives the owner an option to monitor the functionality of the whole system. Besides, inverters can act as power output maximizers: they track the voltage of panels and identify the optimum operational power for the whole array.
