

Zambia cabinet energy storage system company

Overview

What dominated Zambia's energy supply in 2016?

Bioenergy dominated the Zambian energy supply in 2016, with a share of 79%. This was followed by hydropower and petroleum products, each with a share of 9%. Imported electricity, solar photovoltaic (PV) energy and coal had minor shares of the PES. The sectorial energy usage in 2016 was 365.

Why is energy security important in Zambia?

The Government of the Republic of Zambia (GRZ) has set ambitious development goals, and energy security is vital to achieving them. The Energy Efficiency Strategy and Action Plan (EESAP), the first in the history of Zambia, with its set of prescribed actions, was developed to support that purpose.

What is the energy supply pattern in Zambia?

This pattern is expected to continue given the projected growth of the Zambian economy. In 2018, the TPES in Zambia reached 52 PJ. The total energy supply comprises five categories: coal, petroleum products, hydropower, bioenergy and imported electricity.

How many people have access to electricity in Zambia?

Access to electricity in Zambia requires substantial efforts to achieve normal electrification rates. Only 70.6% of people living in urban areas have access to electricity, a figure that drops to only 8.1% for rural areas. No data is available on home appliances and energy consumption patterns for home appliances in Zambia.
